

*leader in high density hot-swap power solutions*

*PowerCassette® - TPCP Series  
1200W Front-End*

### *our commitment to you*

UNIPOWER Corporation is a global company with operations in Coral Springs, Florida & Westford, Massachusetts in the United States and in Lancing, West Sussex in the United Kingdom. Our experience and expertise in providing high-density hot-swap power solutions to the OEM electronics industry spans more than fifteen years. All of the processes and facilities in our operating units have been specifically organised to ensure that you, our customer, gain a competitive edge in serving your markets.

UNIPOWER is a member of a synergistic group of companies with revenues in excess of \$250 million that is owned by North American Fund, giving the company a solid foundation on which we can continue to develop and enhance our service to you.

*PowerCassette® - TPCH Series  
600W - 5 outputs in 2-bay 19" 1U shelf*

### *advanced power solutions through design and innovation*

Our design groups in Coral Springs, Lancing and Westford work hand-in-hand, sharing their experience and expertise to continually develop advanced power technologies that will benefit customers who's main goal is the provision of services to end users with total availability 24 hours a day, 7 days a week.

Through the use of the latest CAD, CAE, simulation software and electronic communications, the seamless transfer of engineering and manufacturing data between each group is assured.

Furthermore, as reliability, quality and international standards are of paramount importance, we have invested in the very latest accelerated life testing (HALT), stress screening (HASS) and Safety & EMC test facilities.

*Inverter - INV2500 Series  
5kVA - 115 or 230VAC hot-swap*

*products to meet your needs*

As the development of technology continues to accelerate, the need for ever smaller space-saving power solutions at increasing power levels is becoming more critical to your designs.

UNIPOWER has invested the last few years developing a range of high-density, low-profile, hot-swap power solutions that meet these needs. The PowerCassette® family of 1U-high multiple output, centralised power solutions and single output Front-End products is just the latest in a whole line of market leading developments that continues.

*Gravitas Energy Systems - X400  
20kW DC Telecom Power System*

*your satisfaction and value through quality*

As part of our commitment to providing you with the highest quality products, our design and manufacturing facilities have been approved to the latest ISO9001:2000 standard and employ a real-time, plantwide, quality data collection and tracking system.

Our experienced compliance engineers keep constantly abreast of international standards developments to ensure that our products will continue to provide the performance levels necessary for your continued success in the years to come.

*Rectifier - RANGER Series  
8,400W - redundant hot-swap*

*behind successful products there are innovative power solutions*

At UNIPOWER we are proud to say that we have helped build some of industry's most successful products. From 100 to 50,000 watts and more, our standard and customised power solutions have powered many important high technology innovations. From servers and networking products to telecommunication networks and storage products; from radar systems and flight simulators to satellite and broadcast equipment, UNIPOWER provides power solutions that solve real problems.

## ***high-density hot-swap power solutions***

- from 100 to 50,000 watts
- extensive range of standard products
- customisation and value-added service
- operations in Lancing, UK and Coral Springs FL, USA
- linked enterprise wide MIS, CAD and communications systems
- representation in over 40 countries
- facility approvals to ISO9001:2000
- in-house regulatory and accelerated life testing facilities
